LABOR VERY SCARCE,

Variety of Other Work Has

Taken Negro From Farm.

KEYSVILLE, VAI, March 11.—There has been much complaint all over the country concerning the great scarcity of labor has been explained in different ways. One is that the raliroads and coal fields and public works are able to pay so much more than the farmer, so nearly all the young and able-bodied negroes abandon the farms. Another is that the wages paid now are very much better than they were in former years, and as the average negro must have so much money each week, and if he can get it by working three or four days in the week, he is sure to loaf around for the rest of the week.
